

HUSSEY COPPER

A LYNN TILTON PATRIARCH PARTNERS COMPANY

To: LEED Director
From: Dennis C. Persinger

Subject: Architectural Copper Sheet and Strip Product

Hussey Copper manufactures its architectural copper products in Leetsdale, PA according to the requirements of the ASTM-B 370 standard specification for Building Construction. Hussey Copper adheres to the ASTM- B 370 chemical composition specification requirement of 99.5% minimum copper content, including silver.

We certify that Hussey Copper architectural copper sheet and strip is manufactured with a minimum of 95% recycled copper content. The copper is obtained from pre-qualified industrial sources, scrap metal suppliers and internal scrap that are verified to meet our quality control standards.

Market conditions for industrial and scrap metal supply will vary; therefore Hussey cannot identify the ratio of post-consumer to post-industrial scrap copper used on a given order. Copper product manufactured by Hussey Copper is 100% recyclable.

If you have any questions contact me via email at dpersinger@husseycopper.com or directly at 724-251-4254.
