### Architectural Color Palette

### Front and Back Coating Description

Sentriclad® Architectural Metals standard color palette features long-life fluoropolymer resin coating systems. These coating systems will be supplied in 70% polyvinylidene fluoride (PVDF) resin paint systems or fluoroethylene vinyl ether (FEVE) resin paint systems. These metal coating systems are designed to ensure long term color retention, chalk resistance, weatherability and performance. The standard Sentriclad Architectural Metals long-life finish warranty applies to both PVDF and FEVE resin systems. Custom colors and finishes are also available upon request.

Please consult your Sentriclad Architectural Metals Account Manager if you have any questions.
